WHOLESALE CATALOGUE

THE HARRISON H. GIVEN FLORIST CO.

DENVER, COLORADO.

To Our Friends

This list is for Florists and Dealers only and prices quoted herein are subject to no discount. The stock offered herein we guarantee to be equal to any in the United States.

It will be noticed that we quote Eastern prices. Western florists will find it to their interest to purchase from us in preference to our Eastern competitors on account of the *great saving in express charges* and the shorter time the plants will be in transit.

We are thorough and careful in our system of packing, our aim and constant care being to pack as light as is consistent with the safe carriage of the plants. We give liberal count and label everything.

Give us a Trial Order

Five plants of any one variety at hundred rates, except where dozen rates are quoted, in which case six plants will go at the dozen rate, and twenty-five plants at hundred rates. Prices quoted herein are from 2½ inch pots unless otherwise noted.

Your selection of 100 plants in not less than 10 nor more than 20 varieties allowing us to substitute varieties for those of which we are sold out. $5.00.

Two plants each of every variety listed. $6.00.

Cultural Notes.

See that you allow ample drainage.

Plant in 5-inches of good soil such as is used for roses.

Feed and water sparingly until growth has well started, then treat liberally.

Give all air possible. Shade very lightly during the hot days.

As soon as buds begin to show color, gradually withhold stimulants.

Keep the air pure and dry—the walks clean and dry—this is absolutely necessary.

The first flower bud to make its appearance is the Early Crown bud. If this is rubbed off another will come which is also a crown; repeated removals will finally bring us to a late bud which is the last the plant will form—this is a Terminal bud.

Fine 6-inch pot plants can be grown by planting cuttings rooted by June 15th in old carnation or rose benches and lifting into pots about August 15th.

If any variety shows a tendency to burn from feeding sprinkle the top of bed with powdered charcoal.

Remarks.—The foregoing list of varieties we believe to be as good a selection as could be made for western growers. We have not listed a single variety without first carefully considering its merits, both alone and compared with other varieties of the same form and color and wherever we have discarded an old variety and replaced it by a newer one, it is because the newer variety is *without question* superior.

We will be glad to answer by mail any questions or give any information in our power regarding Chrysanthemum culture, or anything pertaining to floriculture.

ROSES.

Some Cultural Hints For Beginners.

The absolute requirements for successful rose culture under glass are well lighted, tight houses, and absolute control of ventilation, moisture and heat. It is useless to try to grow roses during the winter months unless your houses fulfill these requirements. Begin your prepations for growing roses by preparing a compost of 6 parts of fiberous loam (blue grass sod well rotted is the best but if it can not be had prairie sod will do taking only down as far as the roots being careful not to take from too sandy a spot.) and 1 part of cow manure at least two years old.

The soil and manure should be spread in layers and turned over at least three times being careful to thoroughly pulverize all lumps of manure and to chop up the sod finely and thoroughly mix the two. The longer this compost lies the better. As soon after May 1st as possible prepare your benches for planting by white-washing them inside and then having first secured a stock of roses in 2½, 3 or 4 inch pots (the later the season the larger the plants you will need) prepare for planting by covering the cracks in the bottom of the bench with sod laid grass down (be sure you allow at least an inch crack in every foot for drainage) and then fill the bench with enough compost so that when firmed and settled there will be from 4 to 5 inches of dirt for the roses to grow in. Now thoroughly soak the bench and allow it to stand over night. The next day plant your roses about 16 inches apart each way (the exact distance may be varied for some varieties) planting deeply and very firmly and after planting pound down every inch of dirt in the bench and again give a thorough soaking, syringing the foliage lightly. Your houses should be lightly shaded for some days after planting allowing it to come off as soon as plants are established. After the roses are planted *they should never be allowed to dry out.* Water thoroughly early in the day so that the foliage may dry out before night. Syringe the foliage every day to keep down Red Spider. Give all the air possible through the summer months and early fall taking care however that the night temperature never falls below 60 degrees. Watch carefully for Green Fly and at its first appearance smoke your houses with tobacco stems first syringing to prevent the smoke burning the leaves. During the hot summer months it is well to avoid watering during the heat of the day, unless absolutely necessary, on account of liability of burning the foliage.

Start your fire in the fall as soon as you find you cannot keep your houses up to 60 degrees without artificial heat. After you begin firing keep your houses as near 60 degrees night temperature and 70 degrees day temperature as possible. *On the matter of temperature as much as anything depends your success.* Do not feed with liquid manure until after January 15th, and not then unless the plants are in a vigorous state and throwing flower shoots. These hints are not intended for growers of experience but for beginners who will find that the only way to learn to grow roses is by acquiring the necessary experience by patient and careful observation and attention. We advise all beginners in commercial floriculture to read the American Florist published at Chicago, or the Florists Exchange published at New York or both. We will be glad at all times to correspond with beginners and to give any advice or assistance in our power.

HARDY MEMORIAL ROSE.

Rosa Wichuriana.

This beautiful rose is a recent addition to our list, and one that justly commands admiration. Blooms in clusters on the ends of short branches during the entire summer. Flowers white, single, with bright yellow center followed by brilliant red fruit. The foliage of this beautiful plant is of a deep shining green, almost evergreen, trailing prostrate habit, very rapid growth; soon forms a dense mat or covering. Valuable for walls or rockeries. Most beautiful for covering graves in cemeteries.

☞ **Perfectly Hardy.** Per dozen 90c, per 100 $6.00. Fine large 4-inch plants $10.00 per 100.

Forcing Roses.

We grow large quantities of Roses for forcing purposes and are thus enabled to test the newer varieties much better than the smaller florists who grow a limited number of plants. The large number of plants grown by us also enable us to select only the very best wood for propagation. We confidently assert that our stock is as good as can be purchased anywhere.

(For description see General Collection.)

American Beauty. **Mad. C. Testout.**

THE BRIDE

General Collection.

Monthly Everblooming Tea-Roses.

Agrippina.—Grand old "Daily Rose" still very popular, velvety crimson. Best of the chinas.

Bridesmaid.—A pink sport from *C. Mermet.* It is a stronger grower than the parent, has handsome foliage, is shorter jointed, and the flowers are a much livelier pink. A grand variety, a prime favorite. The pink forcing rose par excellence.

Bride The.—A lovely pure white, very fragrant rose, admirably adapted to forcing. The buds have more substance than *Niphetos*, are very full and double, and possesses the good characteristics of *Catherine Mermet.* The finest and most profitable of all the white roses for forcing.

Bon Silene.—Carmine rose, an old favorite, very beautiful in buds. Semi double.

White Bon Silene.—A white sport from the above. Of some habit and foliage.

Christine de Noue.—An elegant deep velvet red tea rose of fine texture and size; forces finely, and is altogether the best new tea rose recently introduced. We think highly of it for all purposes. $8 per 100.

Catherine Mermet.—A beautiful, clear flesh color, with the same silver lustre seen in *La France.* Large, full, well formed; very beautiful in bud. Still one of the very finest and best of forcing roses.

Duchess de Brabant.—Pink, very fragrant, one of the finest garden roses grown, very free blooming.

Ernest Metz.—A robust grower; flowers very large when open, buds long and pointed, produced on long stems; color, soft carmine rose, with deeper colored center.

Grace Darling.—Creamy white, very broadly bordered in rosy peach; very double and of heavy texture, one of the finest teas.

Hermosa.—Best pink bedder, the freest and most persistant bloomer grown. Blooms constantly until checked by frost. Finest rose of all for pot culture.

Inconstant Beauty.—A new Rose, deriving its name of "Inconstant Beauty" (*Beaute Inconstant*) from its quality of producing flowers of different shades on the same plant. The colors vary from crimson to light pink, through shades of tawny red, light yellow with orange and citron-red center, pale flesh with pink center, orange chrome and deep rose. Plant strong and vigorous, flowers full and double. It is a true Tea Rose, consequently ever-blooming and deliciously fragrant.

Madam Jos. Schwartz.—Pure white, elegantly flushed with crimson. Large and sweet and a very free bloomer.

Marie Guillot.—White, tinged with a delicate shade of lemon; large full and beautifully imbricated in form. Highly fragrant.

Souvenir de un Ami.—Flower very full and of good size. Tender rose color. Fine open air bloomer, especially good for out-door planting.

W. F. Bennett.—A beautiful deep crimson rose of delicious fragrance. Difficult to manage but beautiful when well grown.

Whitney, Mrs. W. C.—A new rose of much promise. Good color and shape; deep clear pink; long well shaped buds on good stems. Extremely free bloomer and good grower. Easy to manage. Per 100, $6.00.

Maman Cochet.—A seasons trial leads us to recommend this new rose very highly. The finest new rose of the season; the growth is vigorous, with rich, healthy foliage and extra large flowers, which are borne on long, stout stems, very double and simply exquisite when in bud or half bloom; the color is a deep rose pink, the inner side of petals silvery rose. It will undoubtedly become very popular. $6.00 per 10 0

Madame Cusin.—Color, a rosy purple, base of the petals and center of flowers almost white, no other rose having its peculiar shade; very distinct, and of robust habit. This valuable rose is very popular in the East for forcing.

Madame Schwaller.—The color is a bright, rosy flesh, paler at the base of the petals and deepening on the edges. Apt to come in clusters, which are excellent for cutting.

Papa Gontier.—A lovely Tea Rose. The blooms are large and long, with thick, broad petals of dark carmine crimson; the inner petals are a bright rosy carmine. The most popular forcing rose of its color.

Perle des Jardines.—Without doubt the finest yellow rose in cultivation. Canary or golden yellow flowers, large and beautifully formed, handsome in every stage of development, from the smallest to the open bud. No rose of its color ever cultivated for cut flowers up to the present time is so valuable as this.

Climbing Perle des Jardines.—A climbing sport from the above identical in color and habit except its climbing propensity.

Price from 2 inch pots, per 100, $4.00; 2½ in. per 100 $6.00; 3in., per 100 $8.00; 4in., per 100 $10,00

Hybrid Tea Roses.

American Beauty. Rightly described as an ever-blooming hybrid perpetual. Flowers extra large of beautiful form, and fragrant. Color deep rich rose.

2-Inch pots $1.00 per doz; $6.00 per 100. 3-inch $1.50 per doz.; per 100 $10.00.

American Belle.—A beautiful light pink sport from the above; foliage somewhat smaller and cleaner cut than Beauty, but nearly the same.

Price the same as American Beauty.

Augustine Guinoisseau.—Very pale pink nearly white, a very beautiful flower. A white sport from La France of the same habit and growth.

Belle Seibrecht. (La France X Lady Mary Fitzwilliam)—A true self pink of intense shade, buds long and well shaped. Although very much weakened by over propagation betore dissemination, we believe this variety will. after it has had time to regain its normal strength and vigor, become a universal favorite.

2½-inch pots $2.50 per doz. Per 100 $15.00.

Duchess of Albany.—Color deep Tyrian pink. Habit and foliage same as La France from which it is a sport.

Kaiserin Augusta Victoria.—A grand white rose for forcing either in solid beds or in benches. Extra strong and vigorous growth, blooms very large finely shaped, beautiful fragrance. A splendid white rose for summer planting out of doors or for cemetery use. As hardy as a sage bush.

2-in. pots 90c per doz, $6.00 per 100. 3-in. $1.50; 100 $10.00.

Madam C. Testout.—A really grand rose, of the *La France* type. but larger and of better color. It is clear pink—there is nothing in the rose line that can approach it in color—and the flower is as large as *Baroness Rothchild*, and as tree as *La France*. Very fragrant; a magnificent forcing variety. Especially fine in Colorado for out door planting. Hardy.

La France.—One of the most beautiful of all roses, and unequaled by any in its delicious fragrant. Very large, very double, and superbly formed. Prevailing color is light silvery rose, shaded silvery peach. and often with pink.

Madam Veysset.—A striped sport trom the above variety. Each petal is clearly marked with alternate stripes of deep pink and white. Splendid for pots and out doors.

Meteor.—A velvety-red ever bloomer ot the deepest glowing crimson; flowers of mediun size, very double. petals slightly recurving. A beautiful open rose. free blooming and highly profitable when well grown.

Niphetos.—An old favorite variety noted for its long, handsome pointed white buds. The tendency of this variety to throw short stems may in a measure be overcome by liberal feeding.

Souvenir De Wootton.—This is a remarkably brilliant and striking ever-blooming rose; bright magenta-red. passing at base to fine violet-crimson; richly shaded; flowers are large, and regular, with thick leathery petals and delicious tea scent; makes beautiful buds and is recommended both for open ground and conservatory.

Prices except where noted, 2½-inch pots, per doz. 90c, per 100 $6.00.

Hybrid Perpetuals.

Anne Diesbach.—Clear rosy pink. Very large and showy.

Gloire de Margottin.—Rich dazzling crimson. Free bloomer and a vigorous grower.

General "Jack."—An old favorite. Needs no description.

Jules Margottin.—Bright cherry red. King ot reds. Large, well formed, fragrant flowers.

Mrs. John Laing.—The queen of H. P's. Color satiny pink. Exceedingly fragrant.

Paul Neyron.—Of very large size. Deep shining rose color. Very fine.

Ulric Brunner.—Bright cerise red. Petals beautifully rounded and of hearty texture.

Vicks Caprice.—An extremely strong growing and free blooming rose bearing large blooms beautifully striped with deep pink and white.

Price per doz., 75c. per 100, $6.00.

KAISERIN AUGUSTA VICTORIA.

The best hardy white rose for Summer blooming ever offered

Hardy Climbing Roses.

Baltimore Belle.—Pale blush, variegated carmine rose and white; very double. One of the best climbing roses grown and very popular.

Prairie Queen.—Clear bright pink, sometimes with white stripes. Large and fine.

Crimson Rambler.—(*Climbing Polyantha.*) This fine rose imported from Japan, the land of wonders has proved a decided acquisition. It is a rapid grower and a handsome plant. The immense clusters of semi-double blooms of a lovely crimson color are very handsome.

$6.00 per 100.

Polyantha Roses.

Clotilde Soupert.—The queen of the *Polyanthas.* Pearly white, bright rose center; extremely full; flower very large for the class. A most useful variety.

Mignonette.—Its color is clear, delicate rose, with fragrant and peculiar white makings.

Paquerette.—One of the finest of this class. Pure white and of perfect form, very fine for pots.

Miniature.—Pure white; blooms small and graceful.

$6.00 per 100.

CARNATIONS.

Standard List of Tested Varieties.

Including Many Novelties of 1895. Free from Rust.

Varieties.

For the past two years we have been giving especial care and attention to growing and testing new varieties of this most beautiful flower until we have become recognized specialists in this line. Many of the new varieties which do so well in the heavier soil of the Eastern states do not prove profitable in the West. By careful selection and testing we are enabled to offer our customers only varieties which have stood the test of Western cultivation.

American Flag.—A sport from Portia having red and white striping on petals.

Bride of Erlescourt.—Pearly white. Long stiff stem. Per 100, $5.00.

Mignonette.

Extra selected seed of our own sowing.

We are noted for growing the best strain of Mignonette grown in Colorado. Our success is due mainly to the superior strain of seed sown. We have a limited number of packets of seed saved from selected spikes which we guarantee to produce spikes of bloom equal to those shown in cut.

NOTE—Sow seed in flats in August, as soon as large enough prick off into 2½-inch pots. As soon as plants comfortably fill pots plant into a bench containing 6-inches of good fiberous soil thoroughly enriched with at least ¼ well rotted cow manure. As soon as plants are well established, begin to feed lightly with liquid manure increasing strength as plants begin to throw flower shoots. Disbud carefully and cut out all weak growth, throwing the entire strength of the plant into the stronger shoots.

Cut blooms of our Mignonette sell on this market for $1.00 per dozen retail.

Antirrhinum Majus Alba.

GIANT WHITE SNAPDRAGON.

Height 30 Inches. Color Pure White. Fine for Cut Flowers or Pot Plants.

A Beautiful and Profitable Addition to the List of Flowers For Winter Blooming.

After a thorough trial we heartily recommend ANTIRRHINUM MAJUS ALBA as a most desirable florists flower of extreme beauty, highly profitable and easy to grow.

Commands instant attention wherever shown. Indispensable for funeral work. Fine for loose bunches either alone or with roses, carnations or other long stemmed flowers.

From a bench 5x80 ft., we have cut since September 1st, 1895 up to date (March 1, 1896) over 3,000 blooms which we sold readily at an average price (wholesale) of 6c each.

The keeping qualities of Antirrhinum Majus Alba after cutting are all that could be desired.

Antirrhinum Majus Alba.

During the summer of 1893 a florist near Boston, Mass., noticed among a lot of Antirrhinum (snapdragon) in his garden a plant of different and more graceful habit than the rest; particularly noticable on account of its remarkable floriferousness, its clean cut foliage and the grace and beauty of its bloom of pure white faintly tinged with lemon yellow at the lips of the florets. From this one plant he rooted a number of cuttings which were tested by him during the ensuing winter under various conditions for the purpose of determining the merits of the plant for commercial purposes. The result of the test was more than satisfactory which led to further trial and a more careful selection in propagation which has resulted in producing a most desirable strain of freeflowering, winter blooming Antirrhinum of extreme grace and beauty.

Antirrhinum Majus Alba

Must not be confused with the common garden Snapdragon grown from seed. Which is worthless for forcing purposes.

Antirrhinum Majus Alba

Grows well under the conditions of soil and temperature generally given carnations but does not require such constant attention. Benches should be placed at least 3 feet below the glass to allow enough head room for the tall spikes of bloom which average 30 inches in height. Liberal feed while in growth results in larger and better blooms and more of them. For fine pots

ANTIRRHINUM MAJUS ALBA.

plants rooted cuttings should be potted off in to 2-inch pots and potted on to 3's and 4's not allowing to get pot-bound until desired to bloom. Nothing finer could be desired for massing in open border.

Try it you will find it all we claim for it.

2 1-2 inch pots per dozen 60 cts., per hundred $4.00. **4-inch pots per dozen $1.00, per hundred $10.00.**
